

# SO

our mission: high precision

## GRÜEZI

**SQ Products AG has stood for Swiss Quality in the field of endoprosthetics for over 40 years. A success that makes us proud and is therefore a promise from us to you. As an independent, privately owned company, we have evolved into a modern and reliable partner. In 2019, with the move into our new company headquarters in Inwil, Lucerne, we have more than doubled our spatial capacity.**

Motivated staff, state-of-the-art CNC lathes and milling machines, as well as comprehensive service, are a guarantee for the highest degree of precision. Our expertise is just as much an essential part of our success story as our openness to new challenges. We are your partner when it comes to demanding projects in the field of endoprostheses and instruments. Why not test our performance? We will be there by your side, true to our maxim: our work begins where nature stops.

With warmest regards,

**MARKUS GLAESKE**

CEO SQ Products AG

# S

## “SWISS” IS MORE THAN JUST A PART OF OUR COMPANY NAME.

SWISS QUALITY is our commitment in every way. First and foremost, we understand SWISS QUALITY to be the quality of the products we manufacture, but in particular it is the quality that imbues the entire spectrum of our daily activities. With pride and our decades of experience, SWISS QUALITY is our commitment – and a promise from us to you.

# OUR MOTIVATION FOR YOUR SUCCESS

**We are a reliable partner for our customers and suppliers.**

Planning projects together and steering them successfully to their goal – that is our motivation. In doing so, we cultivate partnerships that are characterized by respect, openness, and trust. When we engage in your project, we are bringing with us our many years of experience and our network. Our services range from consulting on the constructional design of your products to planning the manufacturing processes, logistics, and validation.

**Our promise to you: we will put all our energy in your project!**

# O

# VISION

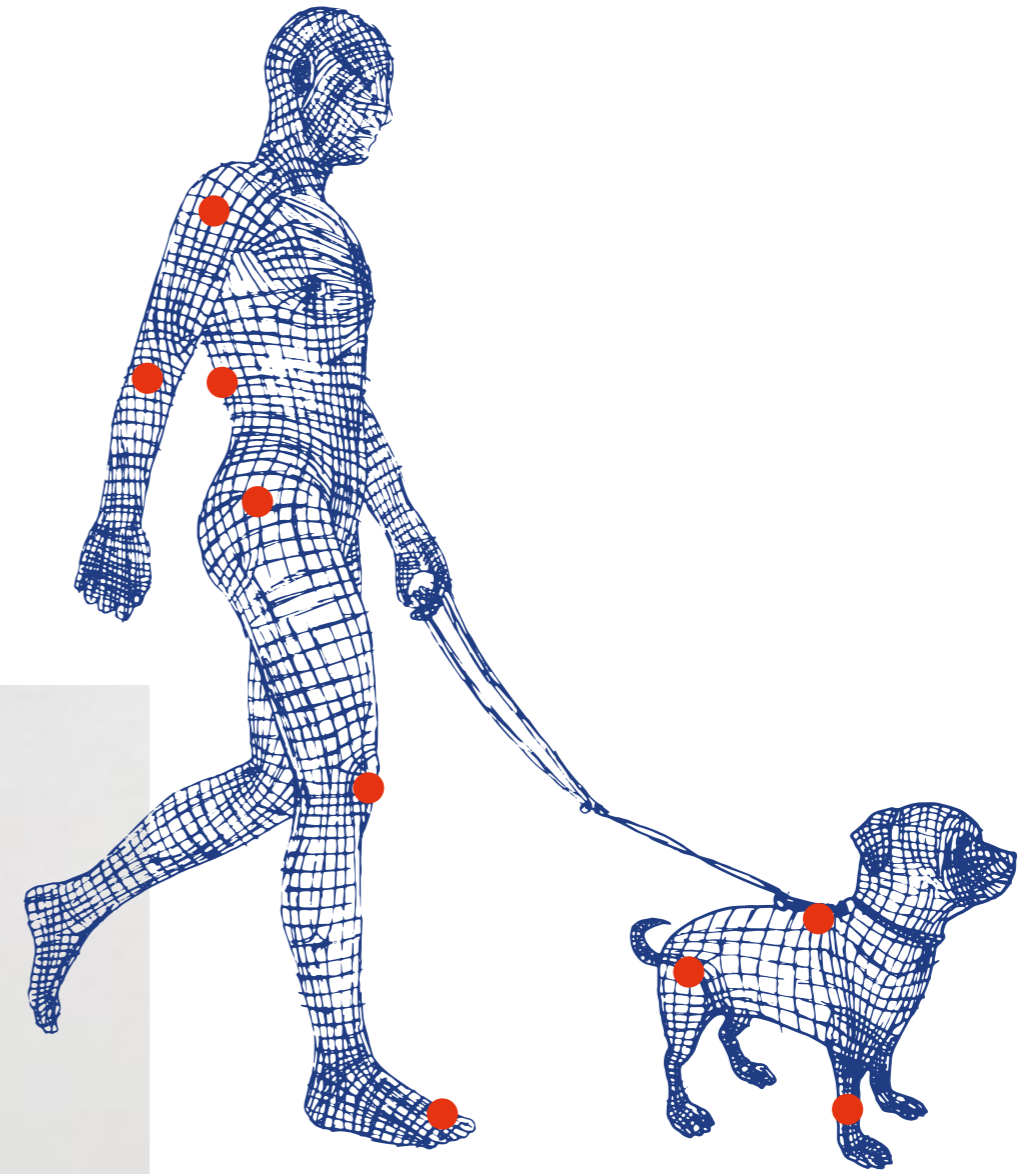

## FLEXIBILITY IN A DEMANDING MARKET

**As a dynamic company, we are looking for new technologies where the knowledge of our employees can be put to good use.**

Our core business is medical technology, especially the field of endoprosthesis. This is where we have been successfully serving clients and patients for several decades. We are always happy to exploit synergies, make use of our infrastructure, and put our expertise to the test. Our corporate culture is characterized by openness, innovation, and flexibility, and is also marked by our curiosity about other industries.

# FOCUS

**With our experience in the production of implants and instruments, which we produce on behalf of our customers in the field of human and veterinary medicine, we have become a leading company in this sector in Switzerland.**

Not only does our strength lie in the precise production and measurement of the parts, but we also provide our customers with support in the constructional design of the implants and instruments from a manufacturing point of view. In addition, we develop the production process based on customer-specific requirements and handle the coordination of all stakeholders as part of the project management.

We are supported in our processes by a modern IT structure, which includes an ERP system with integrated document output management, as well as a sophisticated CAQ system that covers all phases of the product life cycle.

*SQ Products AG is a FDA registered contract manufacturer and certified under EN ISO 13485.*

# PRODUCTION

**SQ Products AG has extensive experience in processing titanium and Ti alloys, CoCr alloys, as well as stainless steel and engineering plastics.**

The products are manufactured and processed on state-of-the-art equipment in the field of

- *CNC lathes and milling machines*
- *3D printing*
- *Wire-cut EDM*

We offer in-house finishing and testing processes in the following areas:

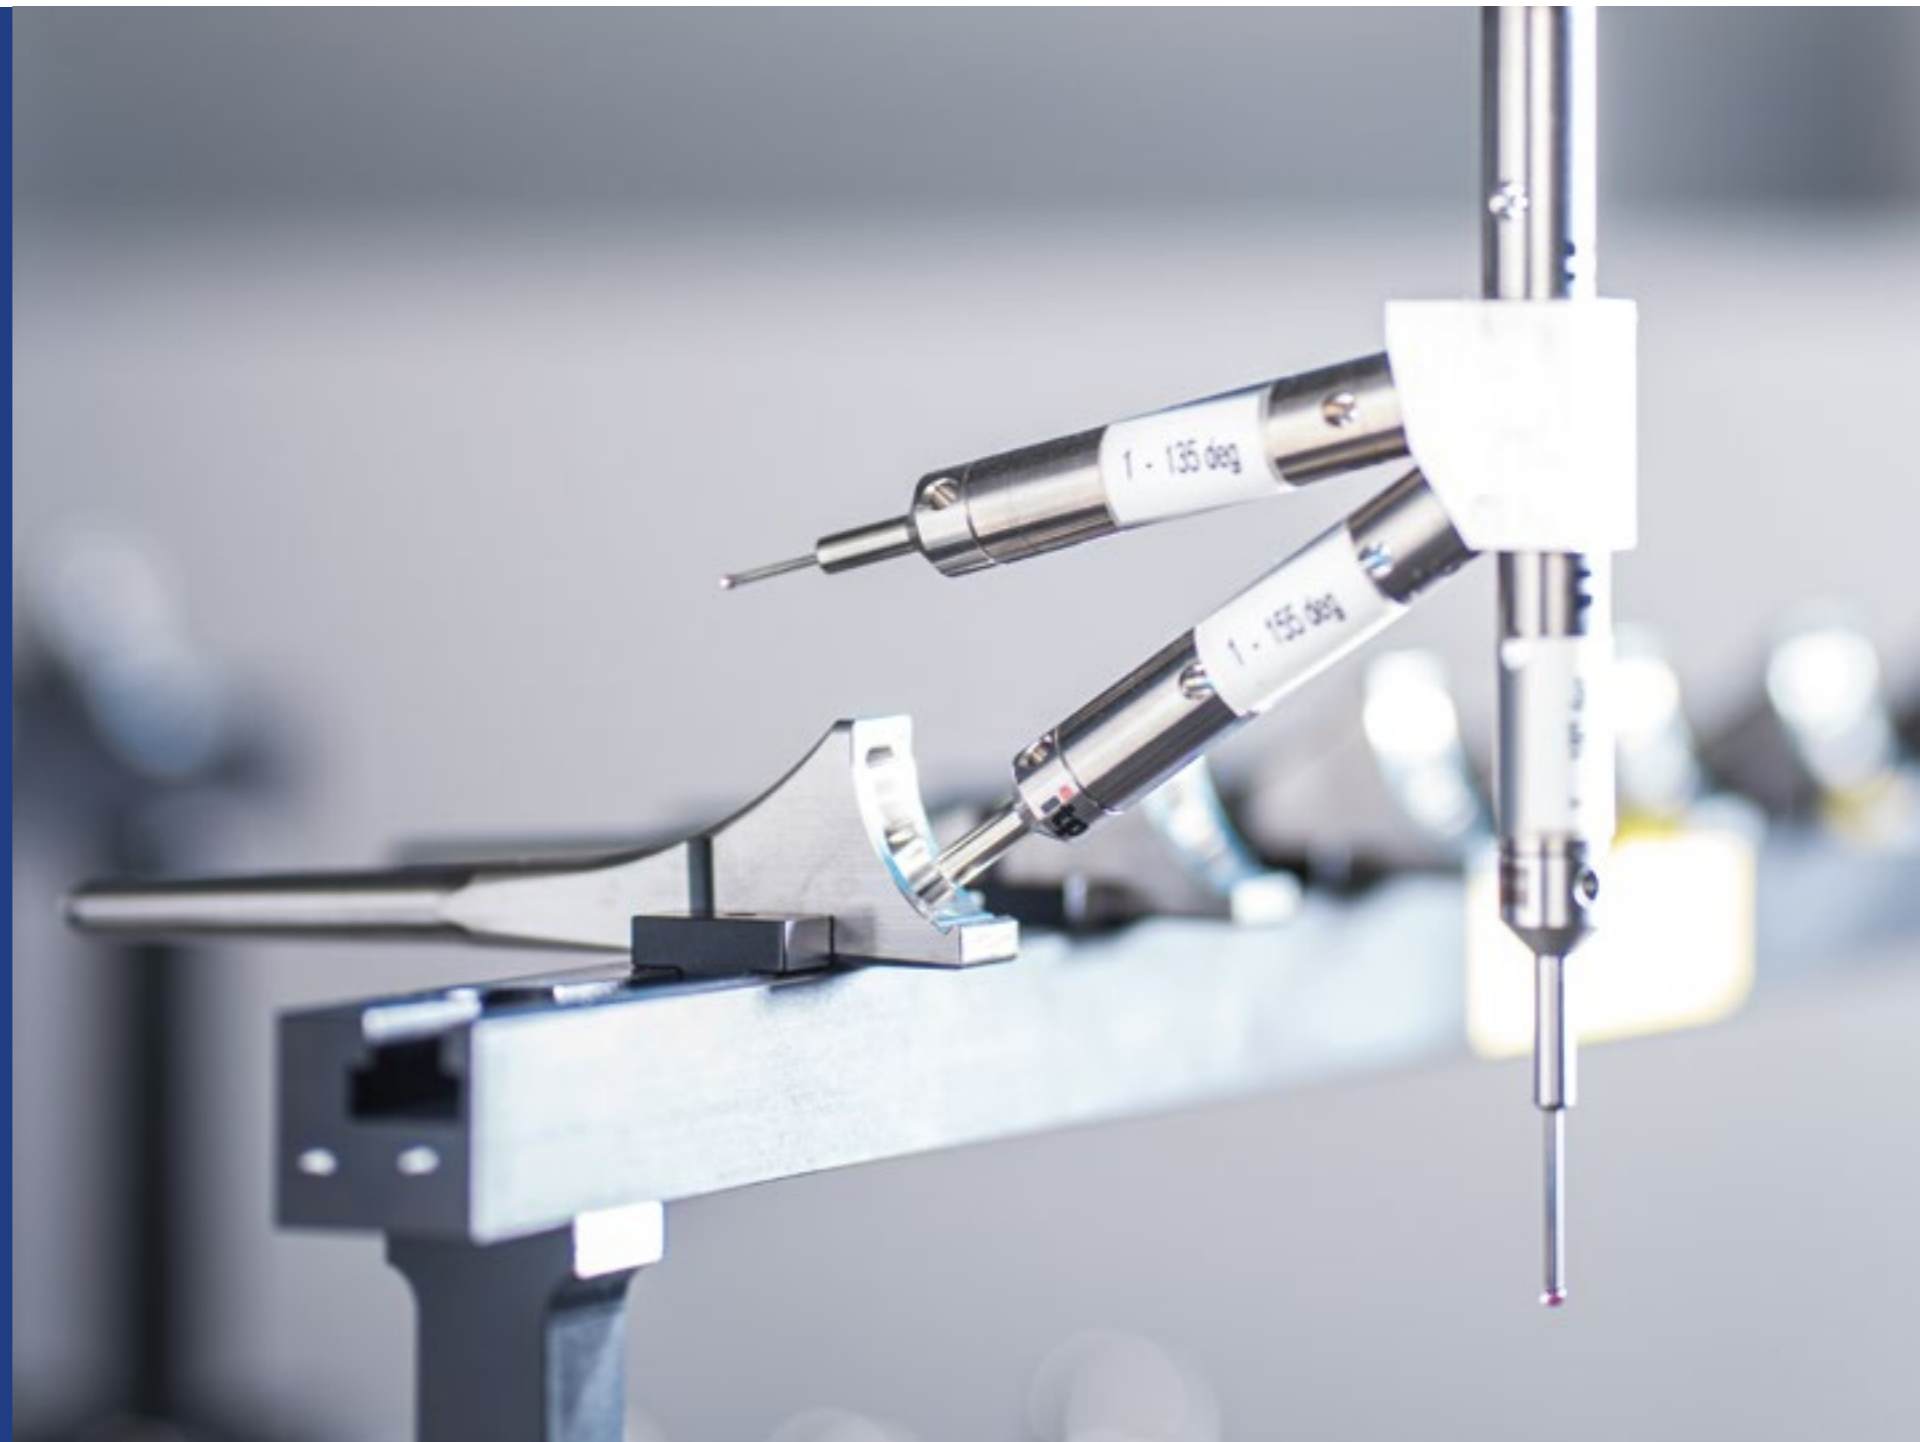

- *Surface treatment (corundum and circulating blasting)*
- *Grinding, polishing*
- *Laser marking*
- *Gluing, pressing, embossing, bending*
- *Interim and final cleaning*
- *3D coordinate measuring technology*

Our suppliers, with whom we have worked for several years in a collaborative relationship based on trust, round off the portfolio with the following processes:

- *Electropolishing*
- *Passivation*
- *Hardening and annealing*
- *Welding*
- *Coating*
- *Customer-specific packaging and sterilizing*

our mission:  
high precision

## SOPHISTICATED & PASSIONATE

**Customers, doctors, and patients place the highest demands on products and consequently on our production.**

We work for and with people. That is why passion and precision are the parameters of our daily endeavor. We see our modern plant and machinery not only as an important investment in our future, but especially in that of our customers, doctors, and patients.

# THE FUTURE IS: OUR TEAM AND YOUR PROJECT.

Our success story is the success story of our team. High levels of qualification and motivation guarantee continuous development. Team spirit is also particularly important to us. Flat hierarchies, an open culture of discussion, as well as professionalism and mutual respect – even in hectic situations – are the mainstays of our cooperative work. Standing still is not an option for us, because we are open to new technological challenges, new processes and paths that also lead to other industries.

**Test and challenge us and let us convince you.
